EXPERIENCE

Salesforce

July 2026 – Present

Cloud Support Engineer (Data Cloud)

Bengaluru, KA

- Joined the **Data Cloud** team as a Technical Support Engineer, supporting enterprise customers on Salesforce's real-time data platform for customer data unification, segmentation, and activation.
- Achieved **Salesforce Administrator** and **Data Cloud Consultant** certifications, demonstrating platform expertise across core Salesforce ecosystem and Data Cloud concepts.
- Developing hands-on expertise in **Data Cloud** concepts including data ingestion, identity resolution, calculated insights, and segment publishing to support complex enterprise customer use cases.

Oracle Financial Services

June 2023 – July 2026

Associate Consultant

Pune, MH

- Designed and developed scalable backend APIs in **Java (Spring Boot)** to support core banking operations such as domestic/international fund transfers and customer data management, enabling secure and reliable processing of transactions.
- Refactored third-party service integrations (**Spring Boot microservices**) including real-time bill payment API and Existing customer verification, enhancing reliability, reducing manual interventions by 30%, and improving end-user experience.
- Leveraged generative AI tools such as **GitHub Copilot** and **Cline** to accelerate development, improve code quality, and automate routine coding tasks, resulting in faster delivery cycles and reduced manual effort.
- Optimized **API performance**, significantly reducing response times and enhancing data processing workflows, ultimately improving the overall **user experience** and system responsiveness.
- Designed and implemented complex database schemas in Oracle, optimizing data retrieval processes that decreased query execution times by 40%, leading to improved user experience and faster application performance.
- Halved the manual testing effort for data validation by implementing automated unit testing using **JUnit**.
- Enhanced developer productivity and release reliability by automating **CI/CD pipelines** with Jenkins and SVN, reducing deployment time by 20%
- Developed responsive retail banking UI screens (e.g., Adhoc Fund Transfer, Login) for Oracle Banking Digital Experience (OBDX) with a custom front-end framework based on Knockout JS, reducing UI-related support tickets by 15%.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL (Oracle SQL, Postgres), Bash/Shell

Backend Technologies: Spring Boot, Oracle, REST APIs, Maven, Microservices

Stream Processing Platform: Kafka

Testing and Monitoring: JUnit, Mockito

Core Competencies: OOP Concepts, Data Structures, Algorithms, SOLID Principles

Coding Platform Ranking: Leetcode

PROJECTS

GenAI Support RAG Chatbot | *Next.js, OpenAI API, Supabase pgvector, Cloudflare Workers*

May 2026

- Built a production-ready customer support RAG chatbot using Next.js, OpenAI, and Supabase pgvector, enabling grounded answers from ingested support documents with source-backed retrieval.
- Implemented streaming chat responses, Markdown-to-safe-HTML rendering, citation cleanup, rate limiting, protected ingest APIs, and Cloudflare Workers deployment using OpenNext.
- Developed a TRACE dashboard to monitor chatbot classification, retrieval, answer generation, latency, errors, and user feedback for debugging and quality evaluation.

EDUCATION

Savitribai Phule Pune University

Aug. 2019 – May 2023

Bachelor of Technology in Computer Engineering, CGPA: 8.66

Pune, MH

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) AI Foundations Associate – 2025

Salesforce Certified Data 360 Consultant
